

## Gemba360: Legal & Compliance Module

### Making Legal Compliance simple

The Gemba System allows Agencies to monitor and manage all their legal, compliance, quality reporting, risk management, OH&S as well as document management reporting within the one system.

The Gemba Compliance system has been setup and implemented at some Agencies in under 24 hours. For a new IT solution this is simply unheard of! Most IT systems are difficult and take over 12 months to implement! The Gemba system is quick, easy and user friendly for all staff. The ability to rollout Gemba in under 24 hours shows just how simple it can be for your Agencies.

Most agencies operate from a number of sites and have to meet a range of legal and compliance obligations. These obligations includes reports to Australian Taxation Office, Superannuation bodies, Office, funding bodies and all of this just takes time.

The Gemba System allows Agencies to manage all their reporting from within a single system - Gemba. Onsite training which is included in the set up costs is really valuable for all staff. The ability to rollout Gemba in under 24 hours shows just how simple it can be for your Agencies.
