

Gemba360: Client & Patient Record Module

Gemba360 Client & Patient Record Module is Australia's leading whole of health and community services information record system.

Gemba360 is Australia's only single Platform that can be utilized by all practitioners across the entire Australian Health and Community Services landscape from ambulatory, primary health subacute across through to acute services.

Compliant with Government Funded Agencies Gemba360 Client & Patient Record Module can be used by any Agency funded by Australian Commonwealth and all State and Territory governments. This includes Medicare, DOHA, DHS, DOH, OATSIH and all others.

Multidisciplinary and Integrated Service Agencies The Gemba360 Client & Patient Record Module can be utilised as a single Client/Patient Record System for Agencies providing multi-disciplinary services such as GP, Dental, Allied Health, Disability, Ambulatory and Acute Services.

Front of Office and Administration Gemba360 Client & Patient Record Module includes a complete Practice Management System capable of handling all office billing and collections.

Client/Patient scheduler The integrated Client/Patient scheduler helps your office maintain an efficient and efficient workflow while clients/patients navigate through your Agency.

Our scheduler can be color coded to visualize particular appointment types with ease.

E-prescribing Gemba360 Client & Patient Record Module's e-prescribing solution can also be incorporated if you deliver these services.

If your Agency provides these services then connected Clients/Patients enjoy the convenience of requesting refill requests online, thus eliminating the need for them to call the office for routine prescription renewal.

Australian Government Agency Certified - NEHTA Gemba360 Client & Patient Record Module is certified by the Australian Commonwealth Government Agency NEHTA.

Secure Messaging It is important to communicate with Client/Patients and colleagues and offers a secure, NEHTA compliant messaging portal that allows you to connect to other Client & Patient Record Module Agencies and their staff.

If your colleague is not using Gemba360 Primary Health Module then referral messages will be sent via our secure email. Our messaging portal also allows for secure communications between health information exchanges.

Client/Patient Portal The Client/Patient portal is necessary to meet meaningful use certification.

Client & Patient Record Module offers a state of the art Client/Patient portal that allows practitioners to communicate with Client/Patients, send clinical reminders, and forward to the Client/Patient educational material with ease.

Out of Home Care, Out Reach and Home Visiting Gemba360 Client & Patient Record Module enables the practitioners to stay connected and provide Continuity of Care while providing Out of Home Care, Out Reach or Home Visiting services.

Lab Connectivity Gemba360 Client & Patient Record Module is fully integrated via Secure Messaging to Pathology and Radiology companies and can also track test result orders performed in your office.

Funded Agency Compliance Gemba360 Client & Patient Record Module is able to monitor, track and report on ALL funded Agency Requirements.

Our knowledgeable staff are available to assist agencies to run setup Crystal or Extract Reporting ready for the Data Submissions to various Government Agencies.

Interface with Ambulatory, GP and Acute Services Gemba360 Client & Patient Record Module enables your Agency Staff to view their Client/Patient census and demographic information within the same system that they view office data.

Customizable The electronic personal and health records allows Agencies to customize tons of data elements to meet their Agency needs. Practitioners are able to customize history items, demographics, progress notes, and many other aspects of the EHR. The progress notes can be customized to meet the needs of any provider and any specialty.

Custom friendly Our Gemba360 Team are able to help you customize Gemba360 Client & Patient Record Module for your Agency. This also includes integrating Gemba with our Finance, HR, Disaster and other modules.

Easy Transition Our knowledgeable staff are capable of helping you make sure that your cash flow is not interrupted when you switch to Gemba360 Client & Patient Module.

Developed and Tested by Practitioners Hundreds of practitioners and developers have poured thousands of hours making sure that our EHR is physician friendly and easily customizable.

Pilot Agencies work very closely with developers to assure that appropriate features are brought to the forefront and well tested.
